# Gritty OS Recruit Hub: Student View

## Development Sprint Spec Outline: Student View Remediations

Sprint 005

Apr 25, 2026

This page contains a set of suggested remediations for the Student View in the Gritty OS Recruit Hub Rebuild project to be completed in a Sprint Session on the date listed above. These remediations are designed to be completed in a single Claude Code session in sprint mode. I am utilizing the Claude Chrome Extension to help provide active context in this view.

**Mode:** sprint-mode with /coach-me skill invoked for entire session

# Scope of Remediations for Sprint 005

This sprint session will be considered Sprint 005. Below is the outline of necessary remediations for this development sprint.

## Key Documentation

| File Description | File Location | Notes |
|---|---|---|
| Sprint 005 Session Spec (built by Claude.ai from this Sprint 005 Outline | "C:\Users\chris\dev\gritty-recruit-hub-rebuild\docs\specs\sprint-005" | |
| ERD State (current Supabase table state my not match current ERD state) | "C:\Users\chris\dev\gritty-recruit-hub-rebuild\docs\superpowers\specs\erd-current-state.md" | Provides map of supabase data tables and connections, although visual may be stale |
| Asset Infrastructure Plan | "C:\Users\chris\.knowing\wiki\Asset-Infrastructure-Strategic-Plan.md" | Provides an Asset Taxonomy for Claude Code in Part 1, which indexes the platform capabilities, integrations, skills, rules and protocols, memory, configs, and records that can be invoked to assist with development in this sprint. “Agents” can be ignored as our sprint mode uses a different agent invocation approach. |
| Skills to be deployed as necessary | superpowers | |
| | Parallel agents | |
| | front-end-design | |
| | planning | |
| | testing | |
| | verification | |
| | review | |
| Permissions to be auto-approved | File reads (Read, Glob, Grep), web lookups (WebSearch, WebFetch, Context7), git inspection (status, log, diff, branch list), system checks (versions, env vars, directory listings). | |
| | Skills that produce analysis, recommendations, or guidance without modifying system state. Examples: brainstorming, systematic-debugging, explain-code, coach-me, obsidian-markdown. Agent invokes without asking or notifying. (See Part 7, Skill Invocation Autonomy Policy for full S1 classification.) | |
| | Any “safe” git permissions | |

---

## Key Factors to Remember in Edits

1. No new tables or data should be needed to execute these edits.
2. All edits made for desktop views of the web app should be paired with the necessary edits for mobile-responsive formatting, including our margin presets.

---

# Student View

## HOME

1. “Take the Tour” Tutorial Slide Modals Remediations - Tutorial Slide Modals should contain the correct images that help prompt student users to the correct sections of the Gritty OS Recruiting Journey. I will include the screenshot file paths that are appropriate for these particular slides.
    a. Welcome to Your Recruit Hub - "C:\Users\chris\dev\gritty-recruit-hub-rebuild\public\tour\browse-step-1-placeholder.png"
    b. Understanding the Data - "C:\Users\chris\dev\gritty-recruit-hub-rebuild\public\tour\browse-step-2-placeholder.png"
    c. Filtering & Browsing - "C:\Users\chris\dev\gritty-recruit-hub-rebuild\public\tour\browse-step-3-placeholder.png"
    d. Your GRIT FIT Score - "C:\Users\chris\dev\gritty-recruit-hub-rebuild\public\tour\browse-step-4-placeholder.png"
    e. Choose Your Path - "C:\Users\chris\dev\gritty-recruit-hub-rebuild\public\tour\browse-step-5-placeholder.png"

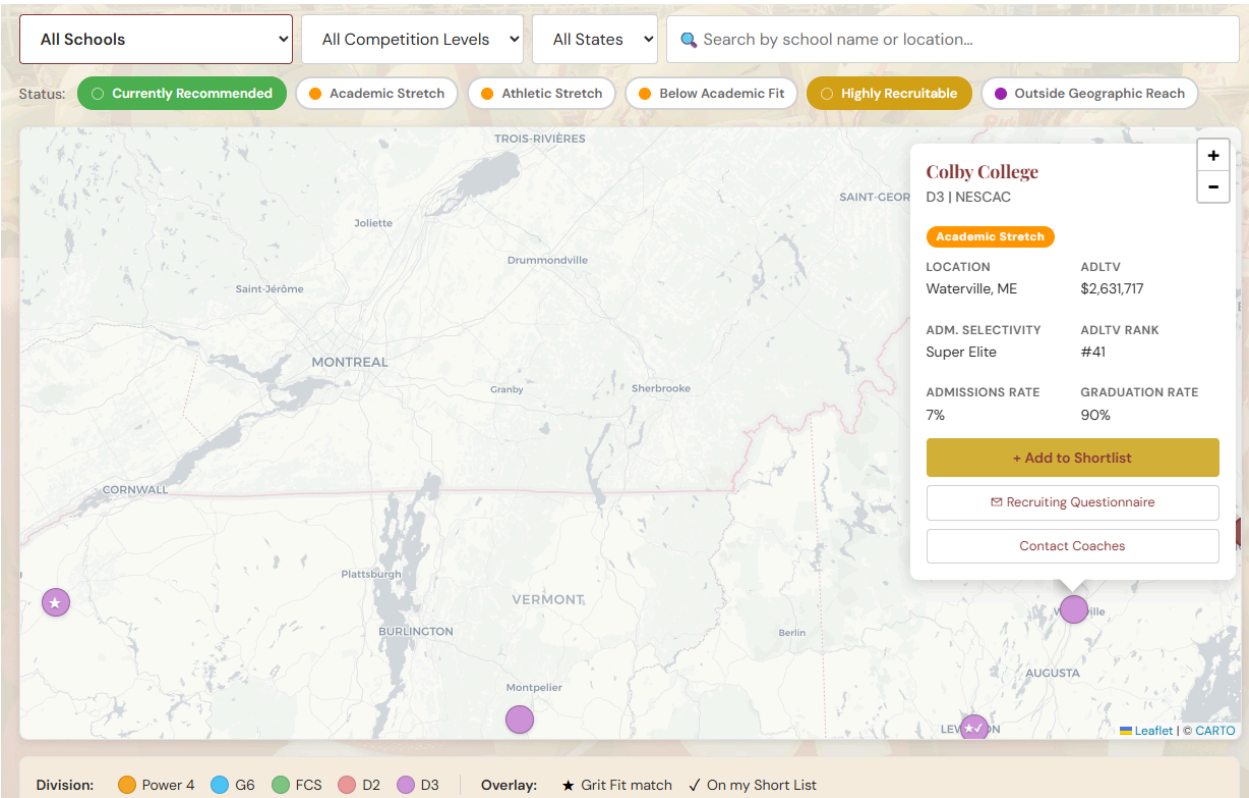
# MY GRIT FIT

1. **Adjusted "Outer Gate" GRIT FIT Scoring Engine Mixer for D2/D3 High Academic Student-Athletes -** In Sprint 004, we did a great job of establishing a workable outer gate for the Grit Fit scoring guide that compensated for the fact that many high academic D3 schools would provide better ADLTV and thus should be recommended over D2 schools within a particular Recruiting Reach for a high academic student with an 85th percentile or greater Academic Rigor Score, and we also ensured that this rule applied to the test optional status of all possible schools per their recommendations. This produces the appropriate mix of the two D2 schools with academic rigor scores that are competitive with High Academic D3 schools (Bentley and Colorado School of Mines). However, upon further review, I found that when a student's score correctly invokes this Academic Rigor and Test Optional "mix" of the two highest performing D2 schools and defaults to the highest rigor and test optional D3 schools in the student's academic reach (as it should), it does not correctly include the "Recruit Reach" factor within the outer gate formula. The outer gate formula does not appear to apply the Recruit Reach radius logic again, when that is still necessary in order for our recommendations to be realistic.

| Rank | School Name | Div | Conf | State | Distance | ADTLV | Your Annual Cost | Actions |
|---|---|---|---|---|---|---|---|---|
| | Colorado School of Mines<br>RMAC | D2 | RMAC | CO | 1778 mi | $2,643,763 | N/A | Add to Shortlist |
| | Middlebury College<br>NESCAC | D3 | NESCAC | VT | 159 mi | $2,207,346 | $57,446 | Add to Shortlist |
| | Grinnell College<br>Midwest | D3 | Midwest | IA | 1110 mi | $2,449,160 | $49,846 | Add to Shortlist |
| | Hamilton College<br>NESCAC | D3 | NESCAC | NY | 227 mi | $2,423,600 | $57,446 | Add to Shortlist |
| | Bates College<br>NESCAC | D3 | NESCAC | ME | 131 mi | $2,134,300 | $57,446 | ✓ In Shortlist |
| | Case Western Reserve University<br>PAC | D3 | PAC | OH | 545 mi | $2,404,168 | $52,519 | Add to Shortlist |
| | Carleton College<br>MIAC | D3 | MIAC | MN | 1116 mi | $2,171,234 | $53,974 | Add to Shortlist |
| | University of Rochester<br>Liberty | D3 | Liberty | NY | 339 mi | $2,176,205 | $53,931 | ✓ In Shortlist |
| | Denison University<br>NCAC | D3 | NCAC | OH | 616 mi | $1,921,440 | $51,513 | Add to Shortlist |

2. **Grit Fit Map Display of "Double Badge" for "Highly Recruitable" Schools and Other Fit -** The Grit Fit Map "Fit Category Pills" work great except for two interrelated challenges. For example, the "Fit Category" Highly Recruitable overlaps with schools for which the student could have multiple "Fit Categories". Therefore, both badges should be displayed in the school details card. Also, if a single Fit Category is selected, this may prompt the surfacing of "multi-fit category schools" on the map. In this situation, for user knowledge, we should ensure that if any school remains on the map when one Fit Category Pill is selected by the user, and that school or schools possess multiple fit-category applications to that particular user, then those applicable Fit Category Pills should be force-selected by our app. In other words, those Fit Category Pills should remain lit if multiple Fit Categories are conjoined by the selection of that particular Fit Category. This provides us with an example that lets us know that a school where multiple "Fit Categories" may apply to the student, so we will also need to create space

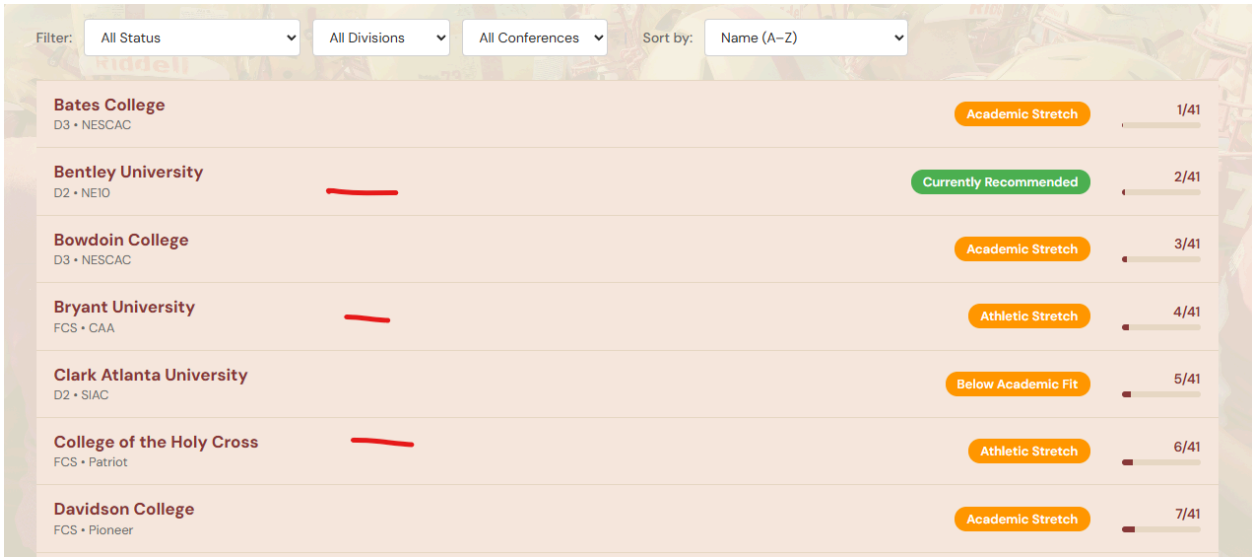
in the details card to feature all the “Fit Categories” that apply to this student’s relationship with each school, not just one or two categories. Multiple “Fit Categories” that apply could include: Currently Recommended, Academic Stretch, Athletic Stretch, Below Academic Fit, Highly Recruitable, and Outside Geographic Reach, depending on the Athletic Fit, Academic Fit, and Recruit Reach Scores for that particular student and school relationship. Currently, for one particular example of this dynamic, this causes schools that are correctly labeled as “Academic Stretches” (or other labels) to appear “unselected” when, in fact, they apply to a school for which the student is “Highly Recruitable” given their Athletic Fit and an “Academic Stretch” given their Academic Rigor/Test Optional Scores.



# YOUR SHORTLIST

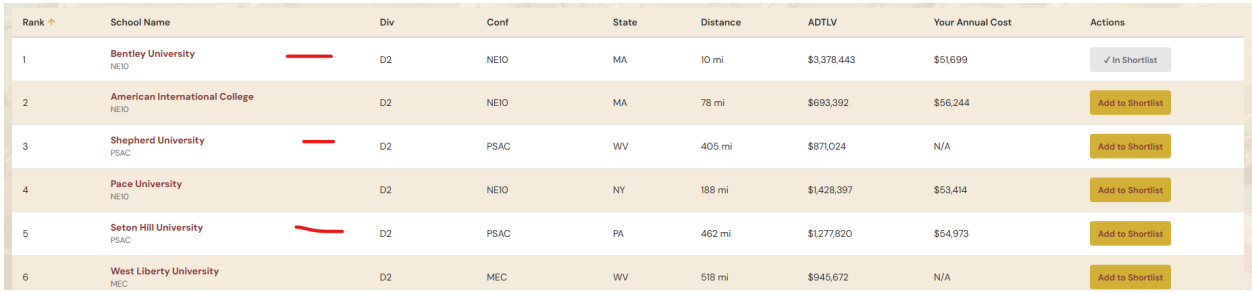
1. **Short List Main View Row Formatting:** I would like to request that the main Short List Table have alternating row colors like the Grit Fit Table View.

## Short List Row Color Formatting: Current State



## Short List Row Color Formatting: Desired State

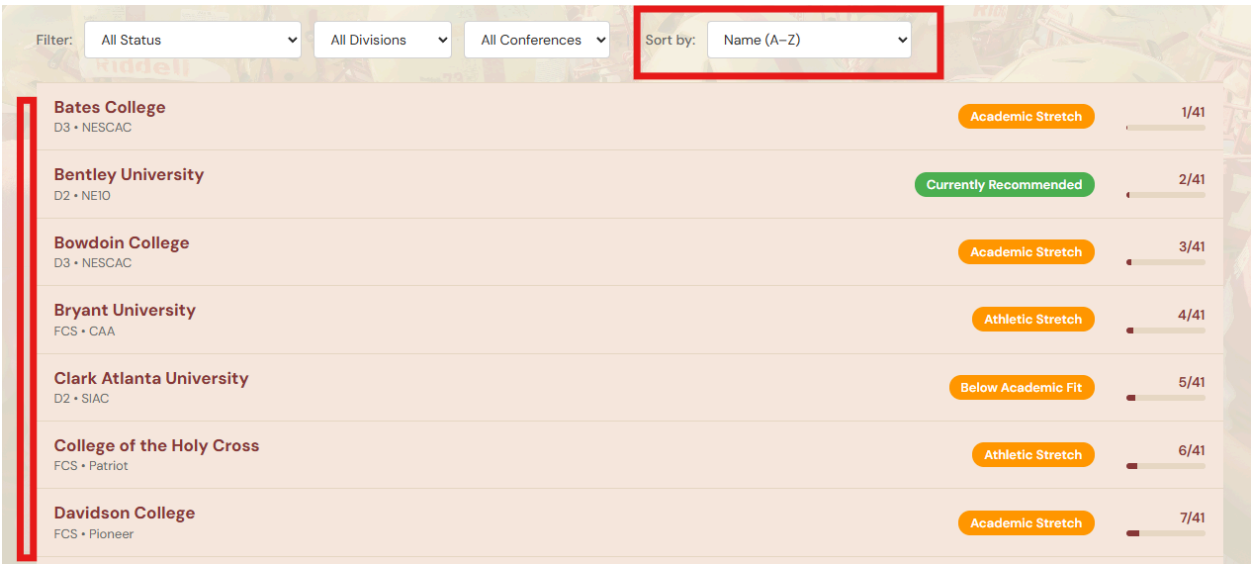
***Note:*** *Apply row background color formatting to Short List Main View only. Nothing else in the Grit Fit Table View example provided here is instructional of any other requested remediations.*



| Rank | School Name | Div | Conf | State | Distance | ADTLV | Your Annual Cost | Actions |
|---|---|---|---|---|---|---|---|---|
| 1 | Bentley University<br>NE10 | D2 | NE10 | MA | 10 mi | $3,378,443 | $51,699 | ✓ In Shortlist |
| 2 | American International College<br>NE10 | D2 | NE10 | MA | 78 mi | $693,392 | $56,244 | Add to Shortlist |
| 3 | Shepherd University<br>PSAC | D2 | PSAC | WV | 405 mi | $871,024 | N/A | Add to Shortlist |
| 4 | Pace University<br>NE10 | D2 | NE10 | NY | 188 mi | $1,428,397 | $53,414 | Add to Shortlist |
| 5 | Seton Hill University<br>PSAC | D2 | PSAC | PA | 462 mi | $1,277,820 | $54,973 | Add to Shortlist |
| 6 | West Liberty University<br>MEC | D2 | MEC | WV | 518 mi | $945,672 | N/A | Add to Shortlist |

2. **Student View Shortlist Main: Dynamic Ranking per Sorting Choice -** The Shortlist should contain a dynamic ranking column similar to the My Grit Fit Table, although the display is slightly different, given that field headers are intentionally left off of the Shortlist. When Shortlist Sorting Filters are selected (Name, Date Added, Distance, Degree ROI, Annual Net Cost, and Fastest Payback), these sorting options dynamically update the rankings of those schools in a new ranking column next to the Shortlist school.

## Short List Dynamic Ranking per Sorting Choice: Current State

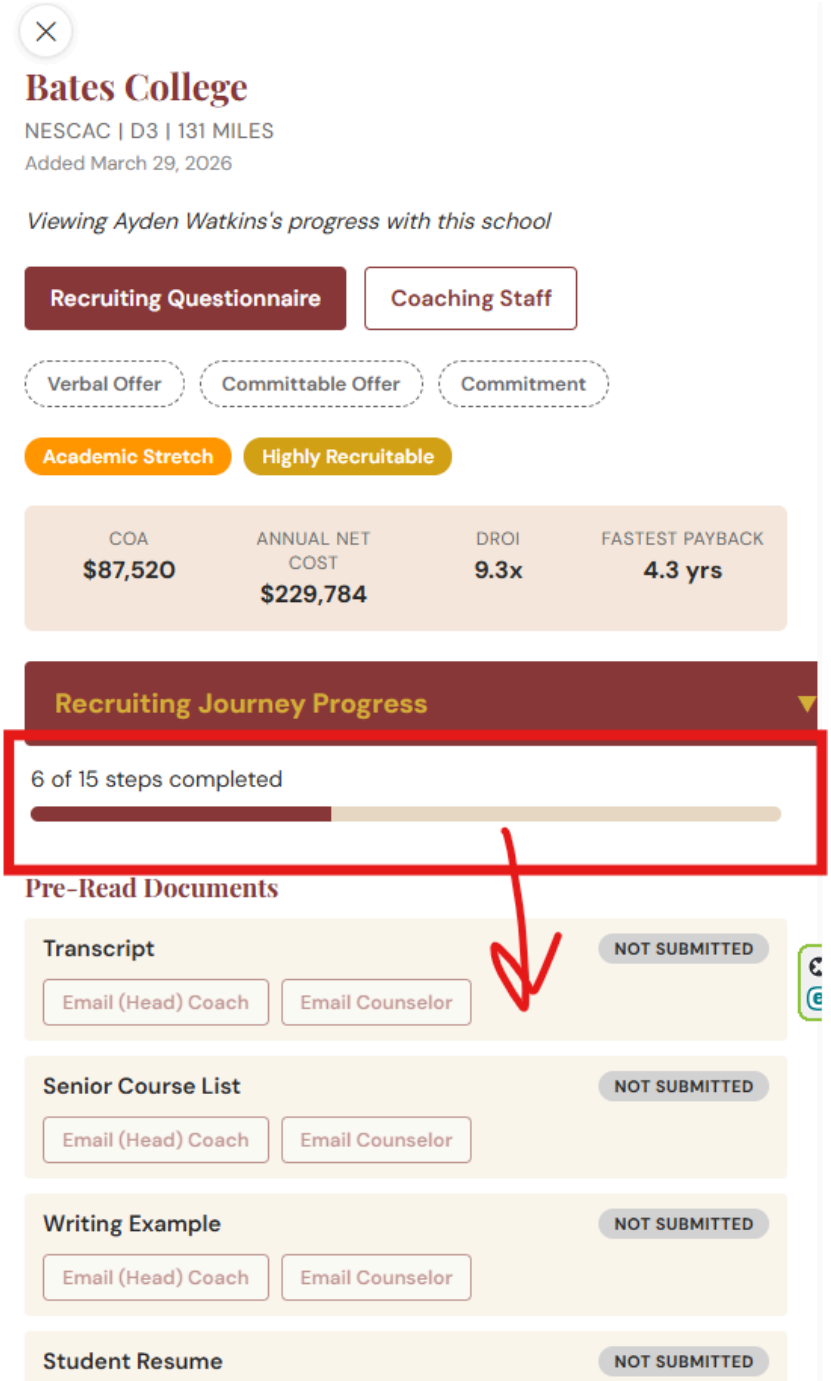


## Short List Dynamic Ranking per Sorting Choice: Desired End State

***Note:*** *Apply dynamic row ranking based on the sorting category selected only, and apply this to the Student Short List Main View only. Nothing else in the Grit Fit Table View example provided here is instructional of any other requested remediations.*

| Rank ↑ | School Name | Div | Conf |
|---|---|---|---|
| 1 | Bentley University<br>NE10 | D2 | NE10 |
| 2 | American International College<br>NE10 | D2 | NE10 |
| 3 | Shepherd University<br>PSAC | D2 | PSAC |
| 4 | Pace University<br>NE10 | D2 | NE10 |
| 5 | Seton Hill University<br>PSAC | D2 | PSAC |

3. **Student View Shortlist Slide-Out View: List the Completed/Incomplete Recruiting Journey Steps -** Currently, when the collapsible Recruiting Journey Progress is open and not collapsed, it reveals the steps to completion progress bar (as it should) but it fails to open the the Recruiting Journey Progress Task List for all 15 steps, which is essential to tracking student progress through the Recruiting Journey process with each school. We need the task list to be included in the slideout and open up underneath the progress bar.



4. **Student View Shortlist Slide-Out View UI: Slideout Animation Necessary for User Clarity -** Currently, the shortlist slideout appears, and I think this transition from the shortlist main view is too sudden and is slightly disorienting for users. We should add a brief animated “slideout” to the slideout card view for each school whenever a shortlist school is selected by click/tap from the Shortlist Main View table. This should be applied to both desktop and mobile edits, as should all other remediations requested above.

5. **Student View Mobile UI:** Stabilize the screen parallax so that users can only tap and drag vertically in mobile view. Right now, in the mobile UI, users are able to accidentally drag the screen horizontally, which creates a very wobbly feel to the app experience as users navigate through.
